

Managed SSL Service

The best way to manage multiple SSL Certificates

Managed SSL Service

GlobalSign's Managed SSL Service provides the ability to quickly; simply and conveniently manage GlobalSign's range of leading SSL Certificates through a web based management interface designed around enterprise specific security requirements, helping organisations significantly reduce the budget, time and management costs associated with using SSL. With one time vetting, administrators can issue SSL Certificates on demand 24/7, 365.

Web-based Platform for easy Certificate Management including:

- Complete certificate lifecycle management
- Control of user privileges
- Comprehensive reporting, billing and accounting functions
- Support for multiple companies under one umbrella account

Welcome to Your Managed SSL Account

Your Pre-vetted Domains and Certificate Profiles:

Tip: Domains vetted to an Extended Validation (EV) level can obtain either OV or EV Certificate types during application.

Domain	Certificate Profile	Vetting Level		Actions
		OV	EV	
dom001.domaintest.jp	O=GlobalSign Corp Edit Profile	OV		Order Certificate
dom002.domaintest.jp	O=GlobalSign Corp Edit Profile	OV	EV	Order Certificate
dom003.domaintest.jp	O=GlobalSign Corp Edit Profile	OV		Order Certificate
dom004.domaintest.jp	O=GlobalSign Corp Edit Profile	OV	EV	Order Certificate

Upcoming Renewals:

Certificates expiring in the next 90 days.

Order ID	Common Name	Issue Date	Expiration Date	Days Left	Actions
CE201101010001	gs.geotrust.co.jp	01/03/2011	06/30/2011	45	Renew Now

The MSSL platform allows you to login and immediately view Certificate's status as the intuitive interface gives single click access to ordering, renewing, and other common certificate actions such as reissuing, downloading certificate files, adding extra domains, and more!

New MSSL v2.0 Features

Centralised Management

Register multiple companies, branches, or departments under one account by creating "profiles". Ideal for umbrella entities needing to manage Certificates for several subgroups, allowing all activity to be monitored, managed and centralised from just one account.

Customised Reporting

Reports can be run and exported to XLS or CSV on activities including application times, issuance times, spend, upcoming renewals, and more. Activity reports can even be run at the user level, ideal for maintaining security and meeting compliance requirements.

Multiple Application Methods

GlobalSign Certificate Centre - a powerful web based SaaS platform to manage all aspects of the Certificate lifecycle.

The screenshot shows the 'Manage Domains & Certificate Profiles' interface. It includes a table with columns for Certificate Profile, Domain, Status, Actions, and Profile Actions. A tooltip explains that the vetting level indicates the type of SSL profile: OV = OrganizationSSL and EV = ExtendedSSL.

Public Ordering Page - when activated, the Public Ordering Page allows organisations to share a hosted co-branded application form. Anybody can place an order for the Certificate via the link and the administrator is alerted to approve new applications.

The screenshot shows the 'Public Ordering Page' interface. It includes a navigation menu, a 'Public Ordering Page' section with a description, and a form for 'Your POP URL'.

API - allows full integration of other systems and workflows.

Granular User Permissions

Define user roles and privileges for users within your organisations based on specific profiles, or even specific domains within a profile, allowing you to control which staff members can apply for, approve, renew, and revoke certificates.

Save Cost & Flexible Payment Options

Reduce SSL costs significantly over purchasing individual retail Certificates or using a competing SSL solution.

Place deposits, opt for Pay as you Go, or purchase true "unlimited" SSL issuance for your entire organisation. Managed SSL also allows an account deposit to be used on SSL and other GlobalSign Digital Certificate solutions and a deposit with GlobalSign does not expire.
